

18/8/26

JS

Task - 2

10 variable name for String :

1. var userName = "Mohan";
2. var cityName = "Chennai";
3. var favFood = "Biryani";
4. var schoolName = "ALL ANGELS";
5. var petName = "Scooby";
6. var textColour = "Red";
7. var imageSize = "Large";
8. var funPlace = "Mall";
9. var shoppingApp = "Flipkart";
10. var timeUp = "Alert";

undefined - 3

1. const userName;
2. const userAge;
3. const userGender;
4. const userAddress;
5. const userNumber;

10 variable name for Number :

1. let userAge = 21;
2. let matchScore = 3;
3. let monthlyRent = 7000;
4. let rollNumber = 6841;
5. let batchId = 12;
6. let pageNo = 10;
7. let breakTime = 30;
8. let bornYear = 2005;
9. let avgSalary = 25,000;
10. let EnrollmentId = 2603;

Null - 3

1. const userName = null;
2. const winRate = null;
3. const homeAddress = null;
4. const userGender = null;
5. const birthPlace = null;

10 variable name for Boolean

- | | |
|------------------------------|-------------------------------|
| 1. const isStudent = true; | 6. const isWinner = true; |
| 2. const isEligible = false; | 7. const isStudied = false; |
| 3. const isPassed = true; | 8. const isApplied = true; |
| 4. const isWorking = true; | 9. const isProfit = true; |
| 5. const isMarried = false; | 10. const isRejected = false; |

Task - 1

18 - snippets

- | | |
|---|--|
| 1. var userName = "Mohan";
console.log(userName); | 12. var mobileName = "I phone";
console.log(mobileName); |
| 2. var cityName = "Chennai";
console.log(cityName); | 13. var courseName = "FullStack";
console.log(courseName); |
| 3. var favFood = "Biryani";
console.log(favFood); | 14. var dreamCompany = "Google";
console.log(dreamCompany); |
| 4. var schoolName = "All Angels";
console.log(schoolName); | 15. var langName = "JS";
console.log(langName); |
| 5. var petName = "Scooby";
console.log(petName); | 16. var favDrink = "Coffee";
console.log(favDrink); |
| 6. var textColour = "Red";
console.log(textColour); | 17. var authorName = "Ram";
console.log(authorName); |
| 7. var imageSize = "Large";
console.log(imageSize); | 18. var favGame = "Badminton";
console.log(favGame); |
| 8. var funPlace = "Mall";
console.log(funPlace); | |
| 9. var shoppingApp = "Flipkart";
console.log(shoppingApp); | |
| 10. var timeUp = "Alert";
console.log(timeUp); | |
| 11. var employeeID = "EI205";
console.log(employeeID); | |

18 - Numbers

1. let userAge = 21;
console.log(userAge);
2. let matchScore = 3;
console.log(matchScore);
3. let monthlyRent = 7000;
console.log(monthlyRent);
4. let rollNumber = 6841;
console.log(rollNumber);
5. let batchId = 12;
console.log(batchId);
6. let pageNo = 10;
console.log(pageNo);
7. let breakTime = 30;
console.log(breakTime);
8. let bornYear = 2005;
console.log(bornYear);
9. let avgSalary = 25,000;
console.log(avgSalary);
10. let enrollmentId = 2603;
console.log(enrollmentId);
11. let benchNo = 5;
console.log(benchNo);
12. let studentHeight = 176;
console.log(studentHeight);
13. let totalMark = 100;
console.log(totalMark);
14. let markScored = 78;
console.log(markScored);
15. let studentWeight = 70;
console.log(studentWeight);
16. let gradePoint = 9;
console.log(gradePoint);
17. let leaveApplied = 3;
console.log(leaveApplied);
18. let studentRank = 3;
console.log(studentRank);

undefined - 3

1. const userName;
console.log(userName);
2. const userAge;
console.log(userAge);
3. const userGender;
console.log(userGender);

Null - 3

1. const studentName = null;
console.log(studentName);
2. const employeeID = null;
console.log(employeeID);
3. const teacherSkills = null;
console.log(teacherSkills);

218 → Boolean

1. `const isStudent = true;`
`console.log(isStudent);`
2. `const isPassed = false;`
`console.log(isPassed);`
3. `const isVerified = true;`
`console.log(isVerified);`
4. `const isOnline = false;`
`console.log(isOnline);`
5. `const isRejected = true;`
`console.log(isRejected);`
6. `const voteEligible = false;`
`console.log(voteEligible);`
7. `const isWorking = true;`
`console.log(isWorking);`
8. `const isMarried = false;`
`console.log(isMarried);`
9. `const isWinner = true;`
`console.log(isWinner);`
10. `const isStudied = false;`
`console.log(isStudied);`

```
const isApplied = true;  
console.log(isApplied);  
  
const isProfit = true;  
console.log(isProfit);  
  
const isRunning = true;  
console.log(isRunning);  
  
const isPresent = true;  
console.log(isPresent);  
  
const isActive = true;  
console.log(isActive);  
  
const isAbsent = false;  
console.log(isAbsent);  
  
const isOpen = false;  
console.log(isOpen);  
  
const isPaid = false;  
console.log(isPaid);  
  
const isValid = false;  
console.log(isValid);  
  
const isError = false;  
console.log(isError);
```
